About Me

I'm a motivated individual with a solid foundation in web development, having graduated from Ilma University and completed a Full Stack Development course at Aptech (NAVVTAC). I'm passionate about learning new technologies and applying them to build innovative web solutions. Skilled in HTML, CSS, JavaScript, Bootstrap, and jQuery, I'm eager to further develop my skills through challenging front-end and full-stack projects. A quick learner and team player, I'm always open to new opportunities for growth.

Skills

- HTML & CSS
- Javascript
- React Js
- PHP,Laravel
- NodeJs
- Mango DB
- Data entry

Education

Bachelor's in Software Engineering

2021 - 2024

Ilma university

Graduated with a comprehensive understanding of software development methodologies, algorithms, and computer programming languages. Gained hands-on experience through projects and coursework in areas such as software design, database management, and system analysis. Developed critical problem-solving and analytical skills, preparing for a career in building efficient and scalable software solutions.

Certificate in Full Stack Development

2024

Aptech Learning Pakistan

Acquired expertise in both front-end and back-end web development, including HTML, CSS, JavaScript, Node.js, and databases. Gained practical experience in building dynamic, responsive websites and web applications. Developed a solid understanding of the full development lifecycle, from designing user interfaces to deploying and maintaining production-ready applications.

Experience

Teacher

2024

Aptech Learning Pakistan

I am teaching a student about HTML, CSS, JavaScript, Bootstrap, and jQuery, focusing on hands-on practical work and individual projects. The student will learn how to develop and design front-end websites and web applications through real-world exercises and guidance. The goal is to equip the student with the necessary skills to work independently and create functional, responsive, and visually appealing front-end projects.
